

About Dropbox

Dropbox is one place to keep life organized and keep work moving. With more than 700 million registered users across 180 countries, we're on a mission to design a more enlightened way of working. Dropbox is headquartered in San Francisco, CA, and has offices around the world. For more information on our mission and products, visit www.dropbox.com.

Our Products

Dropbox Plus

has all the space you need to keep life organized. With 2TB of encrypted cloud storage, there's space for all your content with instant accessibility on any connected phone, tablet, or computer. Tools like computer backup, Dropbox Passwords, and Dropbox Vault make it the perfect hub for all things home and work.

Dropbox Family

brings your family's information together in one place, on one plan. Up to six members have 2TB to share photos, videos, PDFs, and even Google Docs. Each member can access the Family Room, a shared folder that allows every member to stay up to date on important family business. Everyone has their own separate account for personal files—and it's all under one plan with one bill.

Dropbox Professional

provides extra security and storage for your one-person business needs. Dropbox Transfer, premium previews, and deep integrations with other best in class work tools make getting and incorporating client feedback easier than ever. Branded sharing, traffic and insights, viewer history, and 180-day version history means what you keep in your 3TB of space is safe.

Dropbox Business

powers collaboration for more than 500,000 teams across the globe. With Dropbox Spaces, teams have access to an organized hub for distributed work.

Meaning teams can access everything they need for a project—like key files, tasks, meetings, and updates—all in one place. Intelligently suggested files and folders keep your team one step ahead by giving everyone the content they need, when they need it. A secure, distributed infrastructure—plus admin tools for control and visibility—keep your company's data safe in Dropbox.

HelloSign

makes agreements easy with simple and secure eSignatures. With HelloSign, anyone can set up a document for signature, eSign, and track the agreement process for their most important documents. Through the native Dropbox integration, any Dropbox user can send a document out for eSignature without the hassle of opening a separate app. Customers all over the world trust the HelloSign platform—which includes eSignature, digital workflow, and electronic fax solutions with HelloSign, HelloWorks, and HelloFax—to automate and manage their most important business agreements.

DocSend

empowers business professionals to better manage their external deal flows. The secure sharing platform provides control, visibility, and execution for their most critical documents. Users can send and track documents with a single link, all with real-time analytics and control.

Our Infrastructure

Dropbox stores more than 90% of its user data on its own custom-built storage infrastructure. We've also built a global private network with regional accelerators deployed across North America, Europe, Asia, and Australia. This state-of-the-art infrastructure has led to a reduction in latency by as much as 50%, allowing users to retrieve data faster, more reliably, and more securely.

Our Ecosystem

Dropbox has developed strategic partnerships with many best of breed tools, giving customers an open ecosystem to use the tools they prefer at work. Our partners today include Slack, Zoom, Atlassian, Microsoft, Google, and many more.
