

About Dropbox

Dropbox is a leading global collaboration platform that's transforming the way people and teams work together. With more than 500 million registered users across 180 countries, we're on a mission to unleash the world's creative energy by designing a more enlightened way of working. Dropbox is headquartered in San Francisco, CA, and has 12 offices around the world.

Our Products

Dropbox Basic

is the simple, powerful home for your photos, videos, docs, and other files. Your stuff is secure, accessible, and easily shared no matter where you are. Users also get access to exciting new product experiences like **Dropbox Paper**, a collaborative workspace that helps teams create and share early ideas, and work with any type of content, in one centralized place.

Dropbox Plus

provides **unrivaled sync along with 1 TB of space**, powerful sharing features, and increased control. Whether you're a professor sending out lesson plans, a musician creating and sharing a new composition, or a consultant refining a proposal, Dropbox Plus is the home for your passion and creativity.

Dropbox Professional

allows independent workers to store, share, and track their work from one place through premium features. With Showcase, users can highlight their content by creating a professionally branded page. Smart Sync lets users access all their files right from their desktop, without taking up all their hard drive space.

Dropbox Business

lets 300,000 teams—from Under Armour, to National Geographic, to Lagardère Active, to News Corp—work the way they want so they can be more productive. With easy-to-use controls, IT admins

get full visibility and control over how critical work files are accessed and shared, while letting team members continue to use the products they know and love. Dropbox Business meets the needs of organizations of all sizes through three different SKUs—**Standard**, **Advanced**, and **Enterprise**.

Our Infrastructure

Dropbox stores more than 90% of its user data on its own custom-built storage infrastructure. We've also built a global private network with regional accelerators deployed across North America, Europe, Asia, and Australia. This state-of-the-art infrastructure has led to a **reduction in latency by as much as 50%**, allowing users to retrieve data faster, more reliably, and more securely.

Our Ecosystem

Dropbox has developed strategic partnerships with many technology, OEM, distribution, platform, and channel partners to scale globally and deliver integrated end-user experiences. Our partners today include **Adobe, Dell, Deutsche Telekom, HPE, IBM, Microsoft, Samsung, SoftBank, Telmex, Vodafone**, and many others.
